

Wrist / Finger Splint

Dynamic Splint (Extension/Flexion)

Size S / M / L

L R

Indication

- Limited flexion due to paralysis, injury, retraction or after repair of the extensor tendons

Function

- Aid in initiating and performing movements by controlling the plane and range of motion of the injured part

Wrist Splint

Size S / M / L

L R

Indication

- Carpal tunnel syndrome
- Wrist instability due to triangular fibrocartilage complex injury
- Radial nerve paralysis

Function

- Immobilization and stabilization of the wrist
- Closed cell neoprene increases blood circulation through warm effect
- Compressive and proprioceptive effect

Finger Splint

Size S / M / L

Indication

- Sprained finger
- Mallet finger
- Volar Plate injury
- Stable finger fracture

Function

- Hold one or two finger in a fixed position

Thumb Brace

Size S / M / L / XL

Indication

- Ligamentous laxity of the thumb
- Articular effusion and swelling
- Median nerve injury

Function

- Immobilization of the thumb
- Closed cell neoprene increases blood circulation through warm effect
- Compressive and proprioceptive effect

Mallet Finger Splint

Size 1 / 2 / 3 / 4 / 5 / 5.5 / 6

Indication

- Sprained finger
- Mallet finger
- Volar Plate injury
- Stable finger fracture

Function

- Immobilize the distal interphalangeal joint

Frog Finger Splint

Size S / L

Indication

- Sprained finger
- Mallet finger
- Volar plate injury
- Stable finger fractures
