BALANCER SYSTEM ADDRESSES MORE THAN JUST FEAR OF FALLING

FEAR#1

Fear#1 Patient's fear of falling

FEAR#2

Physiotherapists fear of injuring the patient without proper protection, as well as the fear of being injured by a falling patient. Ex. A small female therapist treating/catching a large male patient.

FEAR#3

Facility owner/ manager fear of liability when a patient falls

TARGET LOCATIONS INCLUDE:

Hospitals, senior centers, assisted living facilities, nursing homes, outpatient centers, and private physiotherapy facilities.

HOW CAN BALANCER SYSTEM HELP MY PATIENTS?

- ☑ Reduces/eliminates patients' fear of falling.
- ☑ Frees the patient's hands during therapy sessions for daily functions, including carrying objects, improving posture.
- ☑ Balancer System eliminates the need for patient-therapist and patient-equipment dependents.

BALANCER SYSTEM IS RECOMMENDED FOR THE FOLLOWING PATIENTS:

Geriatric, orthopedic, pediatric, and neurological patients. Patients with lower extremity amputations would also benefit from the system. Even Pediatric patients benefit from Balancer System; pediatric therapists love to use Balancer System when they work with children.

HOW BALANCER SYSTEM CAN HELP PHYSICAL THERAPISTS?

- ☑ Therapist: easy application, eliminates the need to support the patient (especially ambulating stairs).
- ☑ Decreases the physical strain of supporting a patient's weight.
- ☑ Decreases the risk of injury.

HOW BALANCER SYSTEM CAN HELP THE FACILITY?

- ☑ Decreases liability risk for both patients and employees.
- ☑ Decreases the number of assisting personnel required to monitor patient exercises.
- ☑ Support from the best harness in the industry.
- ☑ Eliminates the risk of therapist injury.
