75–135 cm

0°–90°

I am your adjustable inclined board.

With me, your transfer from the lying to the standing position is safe and comfortable – even if you are not actively involved.

With my various adjustment options, I adapt very precisely to your specific body shape – and that from head to toe. Regular standing has a positive effect on your body structures and functions and promotes your activities. In doing so, I support you and at the same time offer you security and weight transfer. With me you have a new perspective – you are at eye-level with your friends and can be pushed with me – making participation in different situations and positions during standing training possible.

new

I can be very simply adjusted in height and angle. So I can easily bring you up to eye-level with your sister.

Precise tilting of the lying surface
is possible from 0–90° via
gas pressure spring.

An optimal foot position
is achieved by
individually 3D-adjustable footrests.

Perfect leg guidance
is made possible by legs
adjustable in length and angle.

Frame colour

● Telegrey 4 (white grey)

Precise abduction of the legs
is possible from 0°-30°
via adjusting screw.
